

Agenda Partners with Konfir to Revolutionise Employment Verification

We have partnered with Konfir to transform employment verification within the Agenda background screening portal. This collaboration has significantly accelerated verification speed, reduced administrative burdens, and enhanced the candidate experience.

THE CHALLENGE

Traditional employment verification was slow and complex, leading to hiring delays and frustration for both clients and candidates. Lengthy paperwork and manual processes created inefficiencies that needed to be resolved.

THE SOLUTION

By integrating Konfir, Agenda has streamlined the screening process. Candidates can now complete verifications quickly and securely, allowing businesses to hire faster without compromising compliance or accuracy.

“Our partnership with Konfir has streamlined employment verification, reducing hiring delays and improving the experience for clients and candidates. Konfir’s reliable technology aligns perfectly with our mission to provide high-quality screening solutions.”

Chris Withers, Managing Director, Agenda Screening Services

THE RESULTS

The impact of this partnership has been transformative:

65% of applicants complete their verification in under 30 minutes

84% finalise their verification within 24 hours

Higher completion rates ensure a smoother hiring journey for candidates and employers

“ At Konfir, we are committed to transforming employment verification into a seamless and efficient process. Our collaboration with Agenda is a testament to how technology can simplify screening while maintaining compliance and accuracy. Together, we are reducing the friction in employment verification, making it easier and faster for businesses to hire the right talent. ”

Chris Milligan, CEO of Konfir

LOOKING AHEAD

As Konfir is integrated further into Agenda's screening process, verification times are expected to improve further. With growing familiarity with secure digital verification via Open Banking, Payroll, and HMRC data, adoption rates will continue to rise. While some may assume integrating a waterfall of data sources adds complexity, it actually streamlines the process and allows for more comprehensive fraud checks, making verification faster and more reliable.

POWERFUL PARTNERSHIP

The partnership between Agenda Screening Services and Konfir is redefining employment verification. By leveraging innovative technology, this collaboration is reducing hiring delays, enhancing the candidate experience, and setting a new benchmark for pre-employment screening.

With ongoing integration, the future of employment verification looks even more efficient and seamless.

WHY CHOOSE AGENDA

We go beyond employment verification - we forge strong partnerships built on trust, efficiency, and innovation. Our collaboration with Konfir ensures businesses benefit from a seamless, background screening solution backed by dedicated human expertise. Together, we streamline verification processes, delivering accuracy, speed, and compliance at the highest level.

Comprehensive Background Screening

Fast, accurate, and fully compliant checks tailored to your industry.

Real-Time Updates & Transparent Reporting

Stay informed with instant access to candidate screening progress.

Seamless System Integration

Our intuitive platform streamlines your hiring process effortlessly.

Expert Support When You Need It

A responsive team ready to assist and problem-solve in real time.
